Github : <https://github.com/faheem-fhm>

### Objective

Aspiring AI & Machine Learning Engineer with hands-on experience in machine learning model development, predictive analytics, data preprocessing, and model deployment using Python, Scikit-learn, and Streamlit. Completed a Data Analytics internship with practical exposure to data analysis and visualization. Seeking an entry-level AI/ML role to build intelligent, data-driven solutions.

### Education

- **B.Tech, Artificial Intelligence and Data Science**  
Dhaanish Ahmed College of Engineering,  
Chennai, Tamil Nadu, India | CGPA: 8.36 (Till 5th Semester)
- **Higher Secondary Certificate (HSC) – 2023**  
PRG Hr. Sec. School, Kattumannar Koil, Tamil Nadu (State Board), India | Percentage: 84.5%

### Skills

- **Technical Skills:** Python , SQL
- **Machine Learning:** Scikit-learn, Regression, Classification, Feature Engineering .
- **Data Analysis Concepts :** Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Model Evaluation .
- **Visualization & Business Intelligence :** Power BI, Tableau, Excel, Power Query, DAX, Data Visualization .
- **Libraries :** Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV .
- **Deployment:** Streamlit, GitHub .
- **Tools :** Jupyter Notebook, VS Code, PyCharm, GitHub .
- **Soft Skills:** Time Management, Communication Skills, Problem Solving, Team Collaboration, Adaptability .

### CERTIFICATIONS

- IBM – Deep Learning Certification
- Simplilearn – Machine Learning Certification
- NPTEL – Big Data Computing
- NoviTech – Data Analytics Certification

### Language

- English
- Tamil

### Projects

#### Predictive Maintenance Prediction System

- Developed an ML-based predictive maintenance system to detect potential machine failures using industrial sensor data.
- Performed preprocessing and feature engineering to improve model performance, achieving 96% accuracy.
- Implemented Random Forest and Decision Tree models for equipment failure prediction.
- Reduced downtime risks by enabling proactive maintenance through data-driven insights.

#### Energy Consumption Prediction System

- Built an ML model to forecast household energy consumption using electricity usage data.
- Applied preprocessing and time-based feature analysis, achieving 98% prediction accuracy.
- Implemented regression models including Linear Regression and XGBoost for demand forecasting.
- Generated insights to support efficient energy usage and resource optimization.

#### Crop Recommendation Prediction System

- Developed an AI-based crop recommendation system using soil and environmental parameters.
- Performed EDA, preprocessing, and feature selection, achieving 99% classification accuracy.
- Implemented Random Forest and Logistic Regression models for accurate crop recommendations.
- Built and deployed an interactive Streamlit web application to provide real-time crop recommendations.

### Experience

#### Data Analytics Intern | Novitech R&D Pvt Ltd | Sep 2024 – Nov 2024

- **Data Analysis & Preprocessing:** Performed exploratory data analysis and transformed raw structured datasets into meaningful business insights.
- **Dashboard Development:** Designed interactive Power BI/Tableau dashboards for KPI tracking, performance monitoring, and business decision-making.
- **Reporting Automation:** Automated reporting workflows using Python and SQL, reducing manual effort and improving reporting efficiency.
