MOHAMED FAHEEM S B

Aspiring AI/ML Developer

mohamedxfaheem.fhm@gmail.com — +91 8122918725 — Chennai, Tamil Nadu, India
LinkedIn | GitHub | Portfolio | LeetCode

Objective

Aspiring AI & Machine Learning Engineering with hands-on experience in Machine Learning, Deep Learning, NLP, and Computer Vision, with a strong foundation in Python, SQL, DSA, and OOP. Passionate about building practical applications, solving technical problems, and developing intelligent, data-driven AI solutions.

Education

Dhaanish Chennai College of Engineering, Chennai **Aug 2023 – May 2027**
B.Tech in Artificial Intelligence and Data Science *CGPA: 8.35 (till 6th sem)*

PRG Hr. Sec. School, Kattumannar Koil, Tamil Nadu (State Board) **2022 – 2023**
Percentage: 84.5%

Experience

AI Intern – Novitech R&D Pvt Ltd, Coimbatore **Sep 2024 – Nov 2024**

- Worked on AI/ML projects involving computer vision, healthcare prediction, image classification, and NLP. Developed solutions for object detection, face recognition, OCR, gesture recognition, and spam detection using Python and deep learning.

Data Science Intern – NSIC Technical Service Centre, Chennai **Jan 2025**

- Worked on data analysis, built interactive dashboards using Power BI and Tableau, and automated reports with Python and SQL to convert raw data into meaningful business insights.

Technical Skills

- **Programming Languages:** Python, SQL
- **Software Engineering:** DSA, OOP, Problem Solving, REST APIs, Flask, Git, GitHub, FastAPI
- **Databases:** MySQL
- **Visualization & BI:** Power BI, Excel, Power Query
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Regression, Classification, Feature Engineering
- **Data Analysis:** Data Cleaning, EDA, Feature Engineering, Statistical Analysis, Model Evaluation
- **Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, OpenCV
- **Tools:** Jupyter Notebook, VS Code, PyCharm, Docker

Projects

AI-Powered Data Analytics Platform **[Live]**

- Built an AI analytics platform using FastAPI, React, and DuckDB; leveraged LLMs and RAG for secure Text-to-SQL queries under 150ms on 50k+ rows.
- Developed automated root-cause analysis and Isolation Forest anomaly detection, cutting memory overhead by 70% with Parquet caching.

AI Medical Diagnosis Assistant **[Live]**

- Developed a pneumonia detection system using EfficientNetB0 and Transfer Learning to classify chest X-ray images and provide confidence scores.
- Built and deployed a Flask-based web application with image upload, real-time predictions, and AI-generated medical recommendations, using TensorFlow Lite for lightweight deployment.

AI Resume Analyzer **[Live]**

- Developed an AI-powered web application using Python, Flask, and NLP to analyze resumes against job descriptions, calculate ATS scores, and identify matching and missing skills.
- Implemented Flask API endpoints for chatbot interaction, AI-generated resume improvement suggestions, interview questions, and downloadable PDF reports.

Certifications

- Deep Learning – IBM
- Machine Learning – NPTEL
- Artificial Intelligence For All - Infosys
- Data Analytics Certification – NoviTech
- Power BI – Simplilearn

Languages

- English , Tamil
